RSIII

BACKWASH UNIT with Monaco Style Chair Top

Don't just shampoo their hair, give them luxurious comfort!

Japanese quality and features based on our extensive research provide a better shampoo experience for you and your clients. Shiatsu is a Japanese massage technique that stimulates key pressure points on the body to improve blood flow and relieve muscle tension. The benefits of shiatsu are coming to the salon in the form of shiatsu shampoo. Skilled stylists stimulate acupressure points on the head while providing customers with a comfortable shampoo experience.

Takara Belmont gave the RS-III a host of superb design features to make the shiatsu shampoo a reality. A specially shaped bowl, a snug-fitting neck cushion and a quiet drain. It all adds up to a uniquely relaxing shiatsu shampoo experience. Not just for the client, but for the technician too.
